Index

The reports and statements set out below comprise the annual financial statements presented to the:

Index	Page
Accounting Officer's Responsibilities and Approval	3
Statement of Financial Position	4
Statement of Financial Performance	5
Statement of Changes in Net Assets	6
Cash Flow Statement	7
Statement of Comparison of Budget and Actual Amounts	8
Accounting Policies	9-27
Notes to the Annual Financial Statements	28-45

Accounting Officer's Responsibilities and Approval

The accounting officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the annual financial statements and related financial information included in this report. It is the responsibility of the accounting officer to ensure that the annual financial statements fairly present the state of affairs of the municipality as at the end of the financial year and results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the annual financial statements and was given unrestricted access to all financial records and related data.

The annual financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

The annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgement and estimates.

The accounting officer acknowledges that she is ultimately responsible for the system of internal financial control established by the municipality and place considerable importance on maintaining a strong control environment. To enable the accounting officer to meet these responsibilities, the accounting officer sets standards for internal control aimed at reducing risk of error or deficit in cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The accounting officer is of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

The accounting officer has reviewed the municipality's cash flow forecast for the year ended 30 June 2015, and in the light of this review and current financial position, is satisfied that the municipality has or has access to adequate resources to continue in operational existence for the foreseeable future.

The municipality is solely dependant on the state for continued funding operations. The annual financial statements are prepared on the basis that the municipality is a going concern and that Imbabazane Local Municipality has neither the intention nor the need to liquidate or curtail materially the scale of the municipality.

I certify that salaries, allowances and benefits of Councillors as disclosed in notes 18 and 19 of these Annual Financial Statements are within the upper limits of the framework envisaged in section 219 of the Constitution, read with Remuneration of Public Office Bearers Act and the Minister of Provincial and Local Government's determination in accordance with this Act.

The annual financial statements set out on pages 1 to 45, which have been prepared on the going concern basis, and were approved by the accounting officer on the 31 August 2015, and were signed on its behalf by:

ZM Ndlela
Acting Accounting Officer

Imbabazane Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1. Presentation of Annual Financial Statements

The annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP), issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act (Act 56 of 2003).

These annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention as the basis of measurement, unless specified otherwise.

A summary of the significant accounting policies, which have been consistently applied in the preparation of these annual financial statements, are disclosed below.

These accounting policies are consistent with the previous period, unless otherwise stated.

1.1 Presentation currency

These annual financial statements are presented in South African Rand, which is the functional currency of the municipality.

1.2 Significant judgements and sources of estimation uncertainty

In preparing the annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the annual financial statements.

Revenue Recognition

Accounting Policy 1.15 & 1.16 on Revenue from Exchange Transactions and Revenue from Non-exchange Transactions describes the conditions under which revenue will be recorded by the management of the municipality. In making their judgment, the management considered the detailed criteria for the recognition of revenue as set out in GRAP 9: Revenue from Exchange Transactions and GRAP 23: Revenue from Non-exchange Transactions. The management of the municipality is satisfied that recognition of the revenue in the current year is appropriate.

Financial assets and liabilities

The classification of financial assets and liabilities into categories is based on judgement by management.

Impairment of Financial Assets

Accounting Policy 1.7 Financial Instruments describes the process followed to determine the value by which financial assets should be impaired. In making the estimation of the impairment, the management of the municipality considered the detailed criteria of impairment of financial assets as set out in GRAP 104: Financial Instruments. The management of the municipality is satisfied that the impairment of financial assets recorded during the year, is appropriate.

Useful lives of Property, Plant and Equipment ("PPE")

As described in Accounting Policies 1.4 and 1.5, the municipality depreciates/amortises its property, plant and equipment, and intangible assets over the estimated useful lives of the assets, taking into account the residual values of the assets at the end of their useful lives, which is determined when the assets are available for use. The useful lives and residual values of the assets are based on industry knowledge.

Impairment: Write down of Property, Plant and Equipment, Intangible assets and Inventories

The municipality reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable.

Imbabazane Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.2 Significant judgements and sources of estimation uncertainty (Cont.)

Defined Benefit Plan Liabilities

As described in Accounting Policy 1.13 Employee Benefits, the municipality obtains actuarial valuations of its defined benefit plan liabilities. The defined benefit obligation of the municipality that was identified is Longservice Awards. The estimated liabilities are recorded in accordance with the requirements of GRAP 25 Employee Benefits. Details of the liabilities and the key assumptions made by the actuaries in estimating the liabilities are provided in Note 13 to the financial statements

Going concern assumption

The financial statements have been prepared on a going concern basis

Offsetting

Assets, liabilities, revenues and expenses have not been offset, except when offsetting is required or permitted by a Standard of GRAP

Provisions

Provisions have been raised by the municipality. Additional disclosure of these estimates of provisions are included in note Note 12 - Provisions.

1.3 Investment property

Investment property is property (land or a building - or part of a building - or both) held to earn rentals or for capital appreciation or both, rather than for:

- use in the production or supply of goods or services or for
- administrative purposes, or
- sale in the ordinary course of operations.

Owner-occupied property is property held for use in the production or supply of goods or services or for administrative purposes.

Investment property is recognised as an asset when, it is probable that the future economic benefits or service potential that are associated with the investment property will flow to the municipality, and the cost or fair value of the investment property can be measured reliably.

Investment property is initially recognised at cost. Transaction costs are included in the initial measurement.

Where investment property is acquired through a non-exchange transaction, its cost is its fair value as at the date of

Costs include, costs incurred initially and costs incurred subsequently to add to, or to replace a part of, or service a property. If a replacement part is recognised in the carrying amount of the investment property, the carrying amount of the replaced part is derecognised.

The cost of self-constructed investment property is the cost at date of completion.

Transfers are made to or from investment property only when there is a change in use. For a transfer from investment property to owner occupied property (property, plant and equipment), the deemed cost for subsequent accounting is the fair value at the date of change in use. If owner occupied property becomes an investment property, the entity accounts for such property in accordance with the policy stated under property, plant and equipment up to the date of change in use

Imbabazane Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

Subsequent measurement

Cost model

Investment property is carried at cost less accumulated depreciation and any impairment losses.

Depreciation is provided to write down the costs less estimated residual value by equal instalments over the useful life of the property, which is as follows:

Item	Useful life
Property - Buildings	30 years

Impairments

The entity tests for impairment where there is an indication that an asset may be impaired. An assessment of whether there is an indication of possible impairment is done at each reporting date. Where the carrying amount of an Investment Property is greater than the estimated recoverable amount, it is written down immediately to its recoverable amount and an impairment loss is charged to the Statement of Financial Performance.

An impairment is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined had no impairment been recognised. A reversal of the impairment is recognised in the Statement of Financial Performance.

Derecognition

An Investment Property is derecognised when there is a disposal or no future economic benefits or service potential are to be derived from the property. All gains or losses, which result from the derecognition, are recognised in the Statement of Financial Performance.

1.4 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period.

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits or service potential associated with the item will flow to the municipality; and
- the cost of the item can be measured reliably.

Property, plant and equipment is initially measured at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost.

Where an asset is acquired through a non-exchange transaction, its cost is its fair value as at date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, its deemed cost is the carrying amount of the asset(s) given up.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the entity is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Imbabazane Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Major spare parts and stand by equipment which are expected to be used for more than one period are included in property, plant and equipment. In addition, spare parts and stand by equipment which can only be used in connection with an item of property, plant and equipment are accounted for as property, plant and equipment.

Major inspection costs which are a condition of continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included as a replacement in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspection are derecognised.

Subsequent Measurements

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

Depreciation

Land is not depreciated as it is regarded as having an indefinite life. Depreciation of assets other than land is calculated, using the straight line method, to depreciate their cost to their residual values over the estimated useful lives of the assets. The depreciation method used reflects the pattern in which the asset's future economic benefits or service potential are expected to be consumed by the municipality. Components of assets that are significant in relation to the whole asset and that have different useful lives are depreciated separately. The depreciation rates are based on the following estimated useful lives. Depreciation only commences when the asset is available for use, unless stated otherwise.

The useful lives of items of property, plant and equipment have been assessed as follows:

Item	Useful life
Infrastructure	
Roads - Gravel	10 years
Community	
Outdoor sport facilities	20 years
Community halls	30 years
Public Convenience	30 years
Other Property Plant & Equipment	
Furniture & Fixtures	3 - 10 years
Motor Vehicles	5 years
Office Equipment	5 years
IT Equipment	3 years
Emergency equipment	5 - 15 years
Other assets	2 - 30 years

The residual value, useful life and depreciation method of each asset are reviewed at the end of each reporting date. If the expectations differ from previous estimates, the change is accounted for as a change in accounting estimate. Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Assets which the municipality holds for rentals to others and subsequently routinely sell as part of the ordinary course of activities are transferred to inventories when the rentals end and the assets are available-for-sale. These assets are not accounted for as non-current assets held for sale. Proceeds from sales of these assets are recognised as revenue. All cash flows on these assets are included in cash flows from operating activities in the cash flow statement.

Imbabazane Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.4 Property, plant and equipment (Cont.)

Capital Work In Progress

Capital work in progress is stated at historical cost. Depreciation only commences when the asset is available for use.

Finance Leases

Assets capitalised under finance leases are depreciated over their expected useful lives on the same basis as PPE controlled by the entity or where shorter, the term of the relevant lease if there is no reasonable certainty that the municipality will obtain ownership by the end of the lease term.

Infrastructure Assets

Infrastructure Assets are any assets that are part of a network of similar assets. Infrastructure assets are shown at cost less accumulated depreciation and accumulated impairment. Infrastructure assets are treated similarly to all other assets of the municipality.

Derecognition of Property, Plant and Equipment

The carrying amount of an item of property, plant and equipment is derecognised on disposal, or when no future economic benefits or service potential are expected from its use or disposal. The gain or loss arising from derecognition of an item of property, plant and equipment is included in surplus or deficit for the year when the item is derecognised. Gains or losses are calculated as the difference between the net book value of assets (cost less accumulated depreciation and accumulated impairment losses) and the sales proceeds.

Impairment testing

The municipality reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Major spare parts and stand by equipment which are expected to be used for more than one period are included in property, plant and equipment. In addition, spare parts and stand by equipment which can only be used in connection with an item of property, plant and equipment are accounted for as property, plant and equipment.

Useful lives of assets

The municipality's management determines the estimated useful lives and related depreciation charges. Management will increase the depreciation charge where useful lives are less than previously estimated useful lives.

1.5 Intangible assets

An asset is identifiable if it either:

- is separable, i.e. is capable of being separated or divided from an entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, identifiable assets or liability, regardless of whether the entity intends to do so; or
- arises from binding arrangements (including rights from contracts), regardless of whether those rights are transferable or separable from the municipality or from other rights and obligations.

A binding arrangement describes an arrangement that confers similar rights and obligations on the parties to it as if it were in the form of a contract.

An intangible asset is recognised when

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality; and
- the cost or fair value of the asset can be measured reliably.

An intangible asset shall be measured initially as cost. Where an intangible asset is acquired through a non-exchange transaction, its initial cost at the date of acquisition shall be measured at its fair value as at that date. The municipality assesses the probability of expected future economic benefits or service potential using reasonable and supportable assumptions that represent management's best estimate of the set of economic conditions that will exist over the useful life of the asset.

An intangible asset shall be de-recognised on disposal or when no future economic benefits or service potential are expected from its use or disposal. The gain or loss arising from the derecognition of an intangible asset shall be determined as the difference between the net disposal proceeds, if any and the carrying amount of the asset. It shall be recognised in surplus or deficit when the asset is derecognised.

Expenditure on research (or on the research phase of an internal project) is recognised as an expense when it is incurred.

Imbabazane Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.5 Intangible assets (Cont.)

An intangible asset arising from development (or from the development phase of an internal project) is recognised when:

- * it is technically feasible to complete the asset so that it will be available for use or sale.
- * there is an intention to complete and use or sell it.
- * there is an ability to use or sell it.
- * it will generate probable future economic benefits or service potential.
- * there are available technical, financial and other resources to complete the development and to use or sell the asset.
- * the expenditure attributable to the asset during its development can be measured reliably.

Intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For all other intangible assets amortisation is provided on a straight line basis over their useful life.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

Reassessing the useful life of an intangible asset with a finite useful life after it was classified as indefinite is an indicator that the asset may be impaired. As a result the asset is tested for impairment and the remaining carrying amount is amortised over its useful life.

Internally generated brands, mastheads, publishing titles, customer lists and items similar in substance are not recognised as intangible assets.

Amortisation is provided to write down the intangible assets, on a straight line basis, to their residual values as follows:

Item	Useful life
Computer Software	3 years

Intangible assets are derecognised:

- on disposal; or
- when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss is the difference between the net disposal proceeds, if any, and the carrying amount. It is recognised in surplus or deficit when the asset is derecognised.

1.6 Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or a residual interest of another entity.

Initial recognition

The entity classifies financial assets and financial liabilities into the following categories.

Financial liabilities measured at amortised cost.

Classification depends on the purpose for which the financial instruments were obtained / incurred and takes place at initial recognition.

Financial instruments are recognised initially when the municipality becomes a party to the contractual provisions of the instruments.

The municipality classifies financial instruments, or their component parts, on initial recognition as a financial asset or a financial liability in accordance with the substance of the contractual arrangement.

Initial measurement of financial assets and financial liabilities

The entity measures a financial asset and financial liability initially at its fair value plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

Subsequent measurement

Loans and receivables are subsequently measured at amortised cost, using the effective interest method, less accumulated impairment losses.

Financial liabilities at amortised cost are subsequently measured at amortised cost, using the effective interest method.

Imbabazane Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.6 Financial instruments (continued)

Receivables from exchange transactions

Trade receivables are measured at initial recognition at fair value, and are subsequently measured at amortised cost insuring the effective interest rate method. Appropriate allowances for estimated irrecoverable amounts are recognised in surplus or deficit when there is objective evidence that the asset is impaired. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation, and default or delinquency in payments (more than 90 days overdue) are considered indicators that the trade receivable is impaired. The allowance recognised is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the effective interest rate computed at initial recognition.

The carrying amount of the asset is reduced through the use of an allowance account, and the amount of the deficit is recognised in surplus or deficit within operating expenses. When a trade receivable is uncollectible, it is written off against the operating expenses in surplus or deficit.

Trade and other receivables are classified as loans and receivables.

Payable from exchange transactions

Trade payables are initially measured at fair value, and are subsequently measured at amortised cost, using the effective interest rate method.

Cash and cash equivalents

Cash and cash equivalents comprise cash on hand and demand deposits and other short-term highly liquid investments that are readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value. These cash and cash equivalents are initially recorded at fair value and subsequently recorded at amortised cost.

A binding arrangement describes an arrangement that confers similar rights and obligations on the parties to it as if it were in the form of a contract.

Gains and losses

A gain or loss arising from a change in a financial asset or financial liability is recognised as follows:

For financial assets and financial liabilities carried at amortised cost, a gain or loss is recognised in surplus or deficit when the financial asset or financial liability is derecognised or impaired, through an amortisation process

Derecognition

Financial assets

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognised where:

- the rights to receive cash flows from the asset have expired
- the municipality retains the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a 'pass-through' arrangement; or
- the municipality has transferred its rights to receive cash flows from the asset and either has transferred substantially all the risks and rewards of the asset, or
- has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

Where the municipality has transferred its rights to receive cash flows from an asset and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognised to the extent of the municipality's continuing involvement in the asset. Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the municipality could be required to repay.

Financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged, cancelled or expires. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective amounts is recognised in surplus or deficit.

Impairment of financial assets

The municipality assesses at each reporting date whether a financial asset or group of financial assets is impaired.

If there is objective evidence that an impairment loss of loans and receivables carried at amortised cost has been incurred, the amount of the losses measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate (i.e. the effective interest rate computed at initial recognition). The carrying amount of the assets shall be reduced either directly or through the use of an allowance account. The amount of the loss shall be recognised in surplus or deficit. The municipality first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, and individually or collectively for financial assets that are not individually significant. If it is determined that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, the asset is included in a group of financial assets with similar credit risk characteristics and that group of financial assets is collectively assessed for impairment. Assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognised are not included in a collective assessment of impairment.

Imbabazane Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.7 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

When a lease includes both land and buildings elements, the entity assesses the classification of each element separately.

Finance leases - lessee

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

Minimum lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of on the remaining balance of the liability.

Any contingent rents are expensed in the period in which they are incurred.

1.7 Leases (continued)

Operating leases - lessor

Operating lease revenue is recognised as revenue on a straight-line basis over the lease term.

Initial direct costs incurred in negotiating and arranging operating leases are added to the carrying amount of the leased asset and recognised as an expense over the lease term on the same basis as the lease revenue.

Income for leases is disclosed under revenue in statement of financial performance.

Operating leases - lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between

1.8 Impairment of cash-generating assets

Cash-generating assets are those assets held by the municipality with the primary objective of generating a commercial return. When an asset is deployed in a manner consistent with that adopted by a profit-orientated entity, it generates a commercial return.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets held with the primary objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable amount of an asset or a cash-generating unit is the higher its fair value less costs to sell and its value in use.

Useful life is either:

- (a) the period of time over which an asset is expected to be used by the municipality; or
- (b) the number of production or similar units expected to be obtained from the asset by the municipality

A binding arrangement describes an arrangement that confers similar rights and obligations on the parties to it as if it were in the form of a contract.

Imbabazane Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.8 Impairment of cash-generating assets (continued)

Identification

When the carrying amount of a cash-generating asset exceeds its recoverable amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable amount of the asset.

Irrespective of whether there is any indication of impairment, the municipality also tests a cash-generating intangible asset with an indefinite useful life or a cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.

Value in use

Value in use of a cash-generating asset is the present value of the estimated future cash flows expected to be derived from the continuing use of an asset and from its disposal at the end of its useful life.

When estimating the value in use of an asset, the municipality estimates the future cash inflows and outflows to be derived from continuing use of the asset and from its ultimate disposal and the municipality applies the appropriate discount rate to those future cash flows.

Recognition and measurement (individual asset)

If the recoverable amount of a cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

When the amount estimated for an impairment loss is greater than the carrying amount of the cash-generating asset to which it relates, the municipality recognises a liability only to the extent that is a requirement in the Standard of GRAP.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Cash-generating units

If there is any indication that an asset may be impaired, the recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the municipality determines the recoverable amount of the cash-generating unit to which the asset belongs (the asset's cash-generating unit).

If an active market exists for the output produced by an asset or group of assets, that asset or group of assets is identified as a cash-generating unit, even if some or all of the output is used internally. If the cash inflows generated by any asset or cash-generating unit are affected by internal transfer pricing, the municipality uses management's best estimate of future price(s) that could be achieved in arm's length transactions in estimating:

- the future cash inflows used to determine the asset's or cash-generating unit's value in use; and
- the future cash outflows used to determine the value in use of any other assets or cash-generating units that are affected by the internal transfer pricing.

Cash-generating units are identified consistently from period to period for the same asset or types of assets, unless a change is justified.

The carrying amount of a cash-generating unit is determined on a basis consistent with the way the recoverable amount of the cash-generating unit is determined.

An impairment loss is recognised for a cash-generating unit if the recoverable amount of the unit is less than the carrying amount of the unit. The impairment is allocated to reduce the carrying amount of the cash-generating assets of the unit on a pro rata basis, based on the carrying amount of each asset in the unit. These reductions in carrying amounts are treated as impairment losses on individual assets.

In allocating an impairment loss, the entity does not reduce the carrying amount of an asset below the highest of:

- its fair value less costs to sell (if determinable);
- its value in use (if determinable); and
- zero.

The amount of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other cash-generating assets of the unit.

Where a non-cash-generating asset contributes to a cash-generating unit, a proportion of the carrying amount of that non-cash-generating asset is allocated to the carrying amount of the cash-generating unit prior to estimation of the recoverable amount of the cash-generating unit.

Accounting Policies

1.8 Impairment of cash-generating assets (Cont.)

Reversal of impairment loss

The municipality assess at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a cash-generating asset may no longer exist or may have decreased. If any such indication exists, the entity estimates the recoverable amount of that asset.

An impairment loss recognised in prior periods for a cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a cash-generating asset is recognised immediately in surplus or deficit.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

A reversal of an impairment loss for a cash-generating unit is allocated to the cash-generating assets of the unit pro rata with the carrying amounts of those assets. These increases in carrying amounts are treated as reversals of impairment losses for individual assets. No part of the amount of such a reversal is allocated to a non-cash-generating asset contributing service potential to a cash-generating unit.

In allocating a reversal of an impairment loss for a cash-generating unit, the carrying amount of an asset is not increased above

- its recoverable amount (if determinable); and
- the carrying amount that would have been determined (net of amortisation or depreciation) had no impairment loss been recognised for the asset in prior periods.

The amount of the reversal of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other assets of the unit.

Redesignation

The redesignation of assets from a cash-generating asset to a non-cash-generating asset or from a non-cash-generating asset to a cash-generating asset only occur when there is clear evidence that such a redesignation is appropriate.

1.9 Impairment of non-cash-generating assets

Cash-generating assets are those assets held by the municipality with the primary objective of generating a commercial return. When an asset is deployed in a manner consistent with that adopted by a profit-orientated entity, it generates a commercial return.

Non-cash-generating assets are assets other than cash-generating assets.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets held with the primary objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between

Recoverable service amount is the higher of a non-cash-generating asset's fair value less costs to sell and its value in use.

- (a) the period of time over which an asset is expected to be used by the municipality; or
- (b) the number of production or similar units expected to be obtained from the asset by the municipality.

Identification

When the carrying amount of a non-cash-generating asset exceeds its recoverable service amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a non-cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable service amount of the asset.

Irrespective of whether there is any indication of impairment, the entity also tests a non-cash-generating intangible asset with an indefinite useful life or a non-cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable service amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.

Imbabazane Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.9 Impairment of non-cash-generating assets(Continued)

Value in use

Value in use of non-cash-generating assets is the present value of the non-cash-generating assets remaining service potential.

The present value of the remaining service potential of a non-cash-generating asset is determined using the following approach:

Restoration cost approach

Restoration cost is the cost of restoring the service potential of an asset to its pre-impaired level. The present value of the remaining service potential of the asset is determined by subtracting the estimated restoration cost of the asset from the current cost of replacing the remaining service potential of the asset before impairment. The latter cost is determined as the depreciated reproduction or replacement cost of the asset, whichever is lower.

Recognition and measurement

If the recoverable service amount of a non-cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

When the amount estimated for an impairment loss is greater than the carrying amount of the non-cash-generating asset to which it relates, the municipality recognises a liability only to the extent that is a requirement in the Standards of GRAP.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Reversal of an impairment loss

The municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a non-cash-generating asset may no longer exist or may have decreased. If any such indication exists, the municipality estimates the recoverable service amount of that asset.

An impairment loss recognised in prior periods for a non-cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable service amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable service amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a non-cash-generating asset is recognised immediately in surplus or deficit.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Redesignation

The redesignation of assets from a cash-generating asset to a non-cash-generating asset or from a non-cash-generating asset to a cash-generating asset only occur when there is clear evidence that such a redesignation is appropriate.

1.10 Employee benefits

GRAP 25 on employee benefits is to provide accounting principles for amounts or benefits due to employees, their spouses or third parties when employees have rendered services to the municipality, and the rendering of those services entitles employees to certain benefits. This standard prescribes similar requirements to those in terms of IAS 19: Employee Benefits which the municipality has been following in the prior year. Since IAS 19 has been applied in developing the current accounting policy, no significant impact on the financial statements of the Municipality is expected.

Termination benefits are employee benefits payable as a result of either:

- an entity's decision to terminate an employee's employment before the normal retirement date; or
- an employee's decision to accept voluntary redundancy in exchange for those benefits.

Other long-term employee benefits are employee benefits (other than post-employment benefits and termination benefits) that are not due to be settled within twelve months after the end of the period in which the employees render the related service.

Vested employee benefits are employee benefits that are not conditional on future employment.

A constructive obligation is an obligation that derives from an entity's actions where by an established pattern of past practice, published policies or a sufficiently specific current statement, the entity has indicated to other parties that it will accept certain responsibilities and as a result, the entity has created a valid expectation on the part of those other parties that it will discharge those responsibilities.

Imbabazane Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.10 Employee benefits (Continued)

Short-term employee benefits

Short-term employee benefits are employee benefits (other than termination benefits) that are due to be settled within twelve months after the end of the period in which the employees render the related service.

Short-term employee benefits include items such as:

- wages, salaries and social security contributions;
- short-term compensated absences (such as paid annual leave and paid sick leave) where the compensation for the absences is due to be settled within twelve months after the end of the reporting period in which the employees render the related employee service;
- bonus, incentive and performance related payments payable within twelve months after the end of the reporting period in which the employees render the related service; and
- non-monetary benefits (for example, medical care, and free or subsidised goods or services such as housing, cars and cellphones) for current employees.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs. The entity measure the expected cost of accumulating compensated absences as the additional amount that the entity expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The entity recognises the expected cost of bonus, incentive and performance related payments when the entity has a present legal or constructive obligation to make such payments as a result of past events and a reliable estimate of the obligation can be made. A present obligation exists when the entity has no realistic alternative but to make the payments.

Post-employment benefits

Post-employment benefits are employee benefits (other than termination benefits) which are payable after the completion of employment.

Post-employment benefit plans are formal or informal arrangements under which an entity provides post-employment benefits for one or more employees.

Multi-employer plans are defined contribution plans (other than state plans and composite social security programmes) or defined benefit plans (other than state plans) that pool the assets contributed by various entities that are not under common control and use those assets to provide benefits to employees of more than one entity, on the basis that contribution and benefit levels are determined without regard to the identity of the entity that employs the employees concerned.

Actuarial assumptions

Actuarial assumptions are unbiased and mutually compatible.

Financial assumptions are based on market expectations, at the reporting date, for the period over which the obligations are to be settled.

The rate used to discount post-employment benefit obligations (both funded and unfunded) reflect the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the post-employment benefit obligations.

Post-employment benefit obligations are measured on a basis that reflects:

- estimated future salary increases;
- the benefits set out in the terms of the plan (or resulting from any constructive obligation that goes beyond those terms) at the reporting date; and
- estimated future changes in the level of any state benefits that affect the benefits payable under a defined benefit plan, if, and only if, either:
 - those changes were enacted before the reporting date; or
 - past history, or other reliable evidence, indicates that those state benefits will change in some predictable manner, for example, in line with future changes in general price levels or general salary levels.

Assumptions about medical costs take account of estimated future changes in the cost of medical services, resulting from both inflation and specific changes in medical costs.

1.11 Provisions and contingencies

Provisions are recognised when:

- the municipality has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

Accounting Policies

1.11 Provisions and contingencies(Continued)

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reimbursement will be received if the municipality settles the obligation. The reimbursement is treated as a separate asset. The amount recognised for the reimbursement does not exceed the amount of the provision.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense.

A provision is used only for expenditures for which the provision was originally recognised. Provisions are not recognised for future operating deficits.

If an entity has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and

1.12 Revenue from exchange transactions

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

Measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

Rendering of services

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- the amount of revenue can be measured reliably
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality;
- the stage of completion of the transaction at the reporting date can be measured reliably; and
- the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

When services are performed by an indeterminate number of acts over a specified time frame, revenue is recognised on a straight line basis over the specified time frame unless there is evidence that some other method better represents the stage of completion. When a specific act is much more significant than any other acts, the recognition of revenue is postponed until the significant act is executed.

When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

Service revenue is recognised by reference to the stage of completion of the transaction at the reporting date.

Imbabazane Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.12 Revenue from exchange transactions (Cont.)

Interest, Service Fees

Revenue arising from the use by others of entity assets yielding interest, royalties and dividends is recognised when:

- It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality, and
- The amount of the revenue can be measured reliably.

Interest is recognised, in surplus or deficit, using the effective interest rate method.

Service fees included in the price of the product are recognised as revenue over the period during which the service is performed.

1.13 Revenue from non-exchange transactions

Restrictions on transferred assets are stipulations that limit or direct the purposes for which a transferred asset may be used, but do not specify that future economic benefits or service potential is required to be returned to the transferor if not deployed as specified.

Stipulations on transferred assets are terms in laws or regulation, or a binding arrangement, imposed upon the use of a transferred asset by entities external to the reporting municipality.

Tax expenditures are preferential provisions of the tax law that provide certain taxpayers with concessions that are not available to others. The taxable event is the event that the government, legislature or other authority has determined will be subject to taxation. Taxes are economic benefits or service potential compulsorily paid or payable to entities, in accordance with laws and or regulations, established to provide revenue to government. Taxes do not include fines or other penalties imposed for breaches of the law.

Transfers are inflows of future economic benefits or service potential from non-exchange transactions, other than taxes.

Recognition

An inflow of resources from a non-exchange transaction recognised as an asset is recognised as revenue, except to the extent that a liability is also recognised in respect of the same inflow.

As the municipality satisfies a present obligation recognised as a liability in respect of an inflow of resources from a non-exchange transaction recognised as an asset, it reduces the carrying amount of the liability recognised and recognises an amount of revenue equal to that reduction.

Measurement

Revenue from a non-exchange transaction is measured at the amount of the increase in net assets recognised by the municipality.

When, as a result of a non-exchange transaction, the municipality recognises an asset, it also recognises revenue equivalent to the amount of the asset measured at its fair value as at the date of acquisition, unless it is also required to recognise a liability. Where a liability is required to be recognised it will be measured as the best estimate of the amount required to settle the obligation at the reporting date, and the amount of the increase in net assets, if any, recognised as revenue. When a liability is subsequently reduced, because the taxable event occurs or a condition is satisfied, the amount of the reduction in the liability is recognised as revenue.

Taxes

The municipality recognises an asset in respect of taxes when the taxable event occurs and the asset recognition criteria are met.

Resources arising from taxes satisfy the definition of an asset when the municipality controls the resources as a result of a past event (the taxable event) and expects to receive future economic benefits or service potential from those resources. Resources arising from taxes satisfy the criteria for recognition as an asset when it is probable that the inflow of resources will occur and their fair value can be reliably measured. The degree of probability attached to the inflow of resources is determined on the basis of evidence available at the time of initial recognition, which includes, but is not limited to, disclosure of the taxable event by the taxpayer.

Value Added Tax (VAT):

The municipality accounts for VAT on the receipts basis.

Imbabazane Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

Fines

As per IGRAP1 assessing and recognising impairment is an event that takes place subsequent to initial recognition of revenue charged. A provision is raised accordingly when the entity assess the probability of revenue collection. The provision for traffic fines has been calculated based on the historical collection rate.

Gifts and donations, including goods in-kind

Gifts and donations, including goods in kind, are recognised as assets and revenue when it is probable that the future economic benefits or service potential will flow to the municipality and the fair value of the assets can be measured reliably.

1.14 Borrowing costs

It is inappropriate to capitalise borrowing costs when, and only when, there is clear evidence that it is difficult to link the borrowing requirements of an entity directly to the nature of the expenditure to be funded i.e. capital or current.

Borrowing costs are recognised as an expense in the period in which they are incurred.

1.15 Unauthorised expenditure

Unauthorised expenditure means:

- overspending of a vote or a main division within a vote; and
- expenditure not in accordance with the purpose of a vote or, in the case of a main division, not in accordance with the purpose of the main division.

All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.16 Fruitless and wasteful expenditure

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.17 Irregular expenditure

No irregular expenditure that was incurred and identified during the current financial.

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the economic entity's supply chain management policy. Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

1.18 Conditional grants and receipts

Revenue received from conditional grants, donations and funding are recognised as revenue to the extent that the municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. To the extent that the criteria, conditions or obligations have not been met a liability is recognised.

Imbabazane Municipality

Annual Financial Statements for the year ended 30 June 2015

Accounting Policies

1.19 Budget information

Municipality are typically subject to budgetary limits in the form of appropriations or budget authorisations (or equivalent), which is given effect through authorising legislation, appropriation or similar.

General purpose financial reporting by municipality shall provide information on whether resources were obtained and used in accordance with the legally adopted budget.

The approved budget covers the fiscal period from 01/07/2014 to 30/06/2015.

The annual financial statements and the budget are on the same basis of accounting therefore a comparison with the budgeted amounts for the reporting period have been included in the Statement of comparison of budget and actual amounts.

The Statement of comparative and actual information has been included in the annual financial statements as the recommended disclosure when the annual financial statements and the budget are on the same basis of accounting as determined by National Treasury.

1.20 Related parties

A related party is person or an entity with the ability to control or jointly control the other party or exercise significant influence over the other party or vice versa or an entity that is subject to common control or joint control.

The municipality operates in an economic sector currently dominated by entities directly or indirectly owned by the South African Government. As a consequence of the constitutional independence of the three spheres of government in South Africa, only entities within the national sphere of government are considered to be related parties.

Management are those persons responsible for planning, directing and controlling the activities of the municipality, including those charged with the governance of the municipality in accordance with legislation, in instances where they are required to perform such functions.

Close members of the family of a person are considered to be those family members who may be expected to influence, or be influenced by, that management in their dealings with the municipality.

Only transactions with related parties not at arm's length or not in the ordinary course of business are disclosed.

1.21 Cash and Cash Equivalents

Cash includes cash-on-hand and cash with banks. Cash equivalents are short-term highly liquid investments that are held with registered banking institutions with maturities of three months or less and are subject to an insignificant risk of change in value. For the purposes of the cash flow statement, cash and cash equivalents comprise cash on hand, deposits held on call with banks and investments in financial instruments, net of bank overdrafts. Bank overdrafts are recorded based on the facility utilised. Finance charges on bank overdrafts are expensed as incurred.

1.22 Changes in accounting policies, estimates and errors

Changes in accounting policies due to adoption of newly effective Standards of GRAP have been applied retrospectively in accordance with GRAP 3 requirements, except to the extent that it is impracticable to determine the period-specific effects or the cumulative effect of the change in policy or where allowed transitional provisions had been adopted. In such cases the municipality would restate the opening. The provisions of IGRAP 1 have been applied prospectively in line with IGRAP1

1.23 Events after the reporting date

Events after the reporting date that have been classified as adjusting events have been accounted for in the Annual Financial Statements. The events after the reporting date that are classified as non-adjusting events after the reporting date have been disclosed in the notes to the Annual Financial Statements.

1.24 Comparative Information

Prior year comparatives

When the presentation or classification of items in the Annual Financial Statements is amended, prior period comparative amounts are reclassified. The nature and reasons for the reclassification are disclosed, in note 31, Prior period error

1.25 Contingent assets and contingent liabilities

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in the notes to the annual financial statements

Less Provision for doubtful debts	(477 011)	(89 021)
	14 959 869	3 467 492

The balance of R500,000, is the amount due from Uthukela District municipality. Historically, the municipality's equitable share used to be paid to the District who in turn paid over the amount due to the Imbabazane Municipality. The balance is an outstanding amount which the Uthukela District Municipality failed to pay over.

The Municipality applied to the Department of Energy for Grant funding for electrification projects in the 2014/15 for Rosedale, Emahendeni, Enhlanomkhize, Gaurton Bridge, Mdwebu and Italy projects. The Department approved that the Municipality utilise its own funding for the 2014/15 financial year and the Department will re-imburse the Municipality R 15 million in the 2015/2016 financial year.

3. VAT receivable		
VAT receivable	2 437 982	1 370 009

VAT is payable on the receipt basis. Amount claimable to SARS is disclosed in the VAT Control Account where VAT 201s and VAT refunds are offset and amounts due or payable to SARS is disclosed.

9. Finance lease obligation		
Minimum lease payments due		
- within one year	-	171 637
- in second to fifth year inclusive	-	-
	-	171 637
Less: future finance charges		(7 607)
Present value of minimum lease payments	-	164 030
Present value of minimum lease payments due		
- within one year	-	164 030
- in second to fifth year inclusive	-	-
	-	164 030
Non-current liabilities	-	-
Current liabilities	-	164 030
	-	164 030

It is municipality policy to lease certain property, plant and equipment under finance leases.

The average lease term is 3 years.

Interest rates are fixed at the contract date. All leases escalate at 10% p.a. and no arrangements have been entered into for contingent rent.

All Finance Lease obligations reached the end of their lease term during the reporting period.

10. Payables from exchange transactions		
Trade payables	15 245 168	10 392 529
Leave pay accrual	2 511 416	1 143 397
Unallocated Deposits	3 271	-
	17 759 855	11 535 927

Trade and other payables

Trade and other payables are normally settled on 30 day terms.

Leave pay accrual

The leave pay accrual is accrued at the Basic Conditions of Employment Act rate and is accumulated to a maximum of 48 days per employee. Leave pay accrual represents the number of leave days due to individual staff members at the end of the reporting period. The amount of the accrual is the best required estimate expected to settle the present obligation at the reporting date.

10.1 Payables from non - exchange transactions

Finance management grant (FMG)	-	171 921
Municipal infrastructure grant (MIG)	-	2 885 219
Municipal systems improvement grant (MSIG)	35 812	116 775
	35 812	3 173 914

The unspent MSIG Grant will not be rolled-over due to the municipality not meeting criteria for roll-over which requires a permanent Municipal Manager. **Refer to Note 11** for detailed reconciliation.

Finance management grant (FMG)

The main objective of this grant is to roll out financial management reforms embodied in the MFMA through building capacity in financial management. Its primary purpose is to assist in building strong financial management skills.

EPWP grant

This grant is one element within a broader government strategy to reduce poverty through the alleviation and reduction of unemployment

Municipal infrastructure grant (MIG)

This grant is used for infrastructure development

Municipal systems improvement grant (MSIG)

This grant is used for infrastructure, capacity building and restructuring. The capacity building and restructuring grants were set up to assist the municipality in developing their planning, budgeting, financial management and technical skills.

COGTA - IDP grant

The purpose of this grant is to advance community participation in integrated development plans

COGTA - HOD grant

This is the contribution by COGTA towards salaries of acting heads of departments.

Sports and recreation grant

The objective of the grant is to maintain sports facilities and encourage participation in sporting activities in the community.

Library grant

The objective of the grant is to maintain and operate the local library for the benefit of the community.

Road safety grant

The objective is to assist scholars to cross main roads when walking to and from school.

12. Provisions

Reconciliation of Bonus provision

- Opening balance	870 166	781 886
- Expenditure	(1 064 770)	-
- Contributions	3 269 637	88 280
- Closing balance	<u>3 075 034</u>	<u>870 166</u>

Bonus provision

Bonuses are paid as a 13th cheque to employees that qualify. Provision for bonus is calculated based on the qualifying employees latest basic salary.

13. Long Services Awards Provision

Provision for Long-term Service

Total Provision	<u>935 803</u>	<u>744 247</u>
-----------------	----------------	----------------

The movement in the provision are reconciled as follows:

Long-term Service

Balance at beginning of year	744 247	579 769
Contribution to provision	191 556	164 478
Balance at end of year	<u>935 803</u>	<u>744 247</u>
Less Current Portion	(46 418)	(55 241)
Non-current Portion	<u>889 385</u>	<u>689 006</u>

Long-service Awards

The municipality operate an unfunded defined benefit plan for all its employees. Long-service Award is payable after 10 years thereafter to employees.

The most recent actuarial valuations of the present value of the defined benefit obligation were carried out at 30 June 2015 by Arch Actuarial Consulting

The principal assumptions used for the purposes of the actuarial valuation were as follows:

	2015	2014
Discount rate	8.27%	8.17%
General Salary Cost inflation rate	7.24%	7.24%
Nett Effective Discount Rate	0.96%	0.87%
Expected Retirement Age - Females	61	61
Expected retirement Age - Males	61	61

Long Services Awards Provision

The following information regarding Long Service provision pertains to the 2015 financial year:

	2015	2014
Movements in the present value of the Defined Benefit Obligation were as follows:		
Balance at the beginning of the year	744 247	579 769
Current service cost	96 547	77 395
Interest cost	58 625	43 557
Benefits paid	(55 241)	(12 254)
Actuarial losses/(gains)	91 625	55 780
Fund obligation at the end of the year	<u>935 803</u>	<u>744 247</u>

Notes to the Annual Financial Statements

2014

SENSITIVITY ANALYSIS

The results presented are based on a number of assumptions. The extent to which the actual liability faced in the future by the municipality differs from these results will depend on the extent to which actual experience differs from the assumptions made.

The assumptions which tend to have the greatest impact on the results are:

- (1) The discount rate relative to the salary inflation assumptions;
- (2) The average retirement age of employees; and
- (3) Assumed rates of withdrawal of employees from service.
- (4) The general salary inflation rate assumption

SENSITIVITY RESULTS

The liability at the Valuation Date was recalculated to show the effect of:

- (1) A 1% increase and decrease in the assumed general salary inflation rate;
- (2) A two-year decrease and increase in the assumed average retirement age of employees; and
- (3) A 50% decrease in the assumed withdrawal rates from service.
- (4) A 1% increase and decrease in the discount rate;

	<u>7 710 558</u>	<u>7 261 190</u>
Property Rates Penalties	918 557	-
Rates assessed comprises of:		
Assessment rates	19 306 372	18 191 046
Income foregone	(11 595 815)	(10 929 856)
Net assessment	<u>7 710 558</u>	<u>7 261 190</u>
Valuations		
Commercial	57 850 000	57 850 000
State	856 338 000	803 728 000
Small holdings and farms	502 535 000	541 850 000
	<u>1 416 723 000</u>	<u>1 403 428 000</u>

Valuations on land and buildings are performed every 4 years. The last general valuation came into effect on 1 July 2013. Interim valuations are processed on an annual basis to take into account changes in individual property values due to alterations and subdivisions.

Different rate randage is charged for each different category of ratepayers. No additional rebated were granted to any categories of ratepayers except for the compulsory phasing in of certain rates as contained in the Council's approved Property Rating Policy.

Rates are levied on a monthly basis in twelve (12) equal instalments payable on the 7th of the subsequent month. No interest and collection charges are levied on outstanding rates accounts, as agreed with the municipality as part of the phased-in process.

17. Government grants and subsidies

Operating grants		
Equitable share	73 810 914	68 921 000
Cogta IDP grant	-	200 000

Total Government grants and subsidies	<u>101 107 102</u>	<u>97 194 001</u>

Equitable share

The constitution provides that each sphere of government - national, provincial and local - is entitled to an equitable share of revenue raised nationally to enable it to provide basic services and perform the functions allocated to it. The equitable division of revenue takes into account the functions assigned to each sphere and the capacity of each government to pay for these functions through own receipts and revenues. The equitable share is an unconditional allocation.

- Supplimenting the internal audit department
Security Service - Contract commenced as from 21 May 2013 for a three (3) year period
- Security at strategic Municipal buildings
Valuation Service - Contract commenced as from 1 December 2012 until 31 July 2017
- Preparation of the valuation roll in terms of the MPRA

Notes to the Annual Financial Statements

Figures in Rand	2015	2014
-----------------	------	------

26. Contingencies

The following contingencies were identified during the reporting period

Pension fund contributions

The Municipality has been in negotiations with South African Local Government Bargaining Council (SALGBC) regarding the salary and wages collective agreement reached in 2012. Clause 9.3 of this agreement deals with the pension fund contributions as from 01 July 2012. The Unions interpretation of the abovementioned clause claim, is that all employees who received employer contribution of less than 18% prior to 1 July 2012 must received employer contribution of less than 18% as from 1 July 2012. A total of 68.65% of employees in the province are to be affected by this proposal. As a result of this proposal, the Municipality is potentially liable to make retrospective contributions to the employees pension funds to the value of R830 029.96.

Pending legal case against the Municipal Manager and Corporates Services Director

The Municipal Manager and Director: Corporate Services were suspended due to unauthorised expenditure relating to salaries. Legal proceedings have been instituted.

27. Fruitless and wasteful expenditure

Penalties - VAT201	-	2 990
Penalties - EMP201	43 862	51 671
Interest paid	14 190	38 537
	<u>58 052</u>	<u>93 198</u>

Penalties EMP201

Penalties were levied by SARS due to the late submission of EMP201 returns. The reason for the late submission was due to the issues encountered by the Municipality with the SARS e-filing website.

The penalties incurred are irrecoverable. Processes have been improved to ensure that such penalties are not incurred in future.

Interest paid

Fruitless and wasteful expenditure was incurred in the form of interest paid, due to invoices for Telkom and Eskom not being settled in 30 days as required. Efforts have been made to contact the service providers in respect of late of invoices for payment, however due to the nature of the service provided, full payment had to be made.

27.2 Supply chain management deviations
Deviation from supply chain management regulations

Paragraph 12(1)(d)(i) of Government gazette No. 27636 issued on 30 May 2005 states that a supply chain management policy must provide the procurement of goods and services by way of a competitive bidding process.

Paragraph 36 of the same gazette states that the accounting officer may dispense with the official procurement process in certain circumstances, provided that he records the reasons for any deviations and reports them to the next meeting of the accounting officer and includes a note to the annual financial statements.

Various items were procured during the financial year under review and process followed in procuring those goods deviated from the provisions of paragraph 12(1)(d)(i) as stated above. The reasons for the deviations were documented and reported to the Accounting Officer which considered them and subsequently approved the deviation from the normal supply chain management regulation. From a total expenditure of R 123 484 501 deviations were R 3 663 019.63 being approximately 3% of expenditure.

Supply Chain Management Deviations	3 663 020	309 572
Total Supply Chain Management Deviations	<u>3 663 020</u>	<u>309 572</u>

29. Risk Management

Maximum credit risk exposure

Credit risk consists mainly of cash deposits, cash equivalents and trade debtors. The municipality only deposits cash with major banks with high quality credit standing and limits exposure to any one counter-party.

Trade receivables comprise a widespread customer base. Management evaluated credit risk relating to customers on an ongoing basis. If customers are independently rated, these ratings are used. Otherwise, if there is no dependent rating, risk control assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. Individual risk limits are set based on internal or external ratings in accordance with limits set by the municipality. The utilization of credit receivables and the cash and cash equivalents notes.

These balances represent the maximum exposure to credit risk:

Cash and cash equivalents	22 704 007	49 263 209
Financial assets - Investments		
Consumer debtors	13 604 860	8 725 416
	<u>36 308 867</u>	<u>57 988 625</u>

Liquidity risk

The municipality's risks to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit facilities.

Cash flow forecasts are prepared and adequate utilised borrowing facilities are monitored.

The table below analyses the municipality's financial liabilities into amounts due within 12 months after year end:

Payables from exchange transactions	17 759 855	11 535 927
Finance lease obligation	-	208 889
	<u>17 759 855</u>	<u>11 744 816</u>

Interest rate risk

As the municipality has no significant interest-bearing assets, the municipality's income and operating cash flows are substantially independent of changes in market interest rates.

At period ended 30 June 2015, financial instruments exposed to interest rate risk were as follows:

- Call deposits
- Notice deposits

Interest rate sensitivity

The following table demonstrates the sensitivity to a reasonably possible change in interest rates on that portion of financial assets - investments. With all other variables held constant, the municipality's deficit for the year is affected through the impact on variable rate investments as follows:

	Effect on surplus for the year	
	1% increase	2% (decrease)
2014		
Financial assets - Investments	492 622	(985 244)
Cash and cash equivalents	87 254	(174 508)
Consumer debtors		
	<u>579 876</u>	<u>(1 159 752)</u>
2015		
Financial assets - Investments	1% increase	2% (decrease)
Cash and cash equivalents	227,030	(454,060)
Consumer debtors	136,049	(272,097)
	<u>363 079</u>	<u>(726 157)</u>

30. Correction of prior period error		
The comparatives of 2013/2014 have been restated in respect of the following errors:		
30.1 Property, plant and equipment - Infrastructure Assets Costs		
Balance previously reported		58 247 785
Depreciation incorrectly processed against cost		490 983
Balance restated 30 June 2014		<u>58 738 768</u>
30.2 Property, plant and equipment - Accumulated Depreciation Infrastructure Assets		
Balance previously reported	(16 940 972)	
Depreciation incorrectly captured against Accumulated Depreciation	(490 983)	
Accounting for prior year depreciation	(490 983)	
Balance restated 30 June 2014	<u>(17 922 939)</u>	
30.3 Accumulated Surplus		
Balance previously reported	(147 767 513)	
Prior year Depreciation not processed	490 983	
Write-back of stale cheque/EFT's 2013/2014	(50 230)	
Prior year Depreciation on completed projects not processed	93 400	
Accruals not raised 2013/2014	657 708	
Balance restated 30 June 2014	<u>(146 575 652)</u>	
30.4 Payables from exchange transactions		
Balance previously reported	(10 928 448)	
Write-back of stale cheque/EFT's 2013/2014	50 230	
Accruals not raised 2013/2014	(657 708)	
Balance restated 30 June 2014	<u>(11 535 927)</u>	
30.6 Property, plant and equipment - Community Assets Costs		
Balance previously reported	12 061 962	
Prior year projects not capitalised from WIP	12 279 212	
Balance restated 30 June 2014	<u>24 341 174</u>	
30.7 Property, plant and equipment - Accumulated Depreciation Community Assets		
Balance previously reported	(2 624 324)	
Prior year Depreciation on completed projects not processed	(93 400)	
Balance restated 30 June 2014	<u>(2 717 724)</u>	
30.8 Property, plant and equipment - Work in Progress (WIP)		
Balance previously reported	33 861 636	
Prior year projects transferred to PPE	(12 279 212)	
Balance restated 30 June 2014	<u>21 582 423</u>	

31. Going Concern

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

32. Reasons for Comparison Budget and Actual Amounts

32.1 The variance is due to a decrease in other revenue

32.2 The variance is due to a decrease in the issuing of traffic fines

32.3 The variance is due to a increase in salaries relating to the backpay for employees re-instated.

32.4 The variance is due to an increase relating to the capitalisation of completed projects from Work in progress to PPE.

32.5 The variance is due to an increase relating to the derecognition of the Mayor's vehicle which was written-off.

32.6 The variance is due to amount of R 13 million transfer to Sundry Debtors relating the municipality awaiting refund from

32.7 The variance is due to an increase in audit fees relating to the forensic audit into unauthorised expenditure.
